

# Rest of Non-EU

**Author:** Yiorgos Vittis (International Institute for Applied Systems Analysis, FABLE Secretariat)

**Countries in the “Rest of Non-EU” region:** Albania, Belarus, Bosnia and Herzegovina, Iceland, North Macedonia, Republic of Moldova, Montenegro, Serbia, Serbia and Montenegro, Switzerland, Ukraine.

## National Commitments

The **National Commitments** pathway aims to show what will happen if national commitments are met. This requires translating policy commitments into quantitative targets that can be modelled in the FABLE Calculator. Teams have reviewed key policy documents to set up these targets for the food and land use system (agricultural production and trade, climate, biodiversity, food security and dietary recommendations).

In some cases, policy commitments lack clear quantification. **FABLE teams have proposed quantitative targets that are derived or inspired from these national commitments. These are in the yellow column.**

Please provide your feedback regarding these quantitative targets using our [public consultation form](#).

COD E	Policy area	Policy ambition	FABLE team's proposed quantitative national targets	Justification and references	Assumption (A) or Official Source (OS)
1	FOOD				
1a	Food	Undernourishment	<i>Improve the availability of healthy and balanced food for all segments of the population (nutrition)</i>	UNFSS highlights the problem of the availability of healthy and balanced food for all segments of the population (nutrition) <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
1b	Food	Overweight / obesity			
1c	Food	Diet-related disease	<i>Improving the national nutrition system in schools.</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region.	OS

## Rest of Non-EU

				<a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	
1d	Food	Other food related targets	<i>Development of a national system of responsible consumption, reduction of food losses and reduction of waste.</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
2	<b>CLIMATE MITIGATION</b>				
2a	Climate mitigation	Total GHG emissions reduction (by Gas or in CO2e - if in CO2e indicate what is the global warming potential factor used to convert non-CO2 emissions into CO2 - )			
2b	Climate mitigation	Agriculture GHG emissions reduction	<i>Development and presentation of the national structure and platform of carbon agriculture. Development and implementation of a system of voluntary measurement, reporting, and verification of greenhouse gas emissions in agriculture.</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
2c	Climate mitigation	Land use and land use change GHG emissions reduction			
2d	Climate mitigation	Reduce or halt deforestation	<i>Establishment of a national system of advisory services.</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region.	OS

## Rest of Non-EU

			<i>Extensive training of small agricultural producers in the latest technologies, especially climate neutral.</i>	<a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	
2e	Climate mitigation	Other climate mitigation related targets	<i>Increasing the share of bioenergy in the national energy balance. Promoting the use of technologies aimed at reducing the use of fossil fuels in food systems</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
<b>3</b>	<b>BIODIVERSITY</b>				
3a	Biodiversity	Reduce or halt loss of natural ecosystems			
3b	Biodiversity	Promote afforestation	<i>Sum of 350,000 ha by to 2050</i>	BonnChallenge pledges	OS
3c	Biodiversity	Expand protected areas or 'Other effective area-based conservation measures' (OECMs)			
3d	Biodiversity	Expand cropland area under agroecological practices	<i>Limit adverse environmental impacts, especially on climate and biodiversity and foster the adaptation of the agriculture sector to changing overall climatic conditions. For this purpose, the principles of agroecology are used to enhance the resilience of the food system.</i>	Mentioned in UNFSS pathways for Switzerland. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
3e	Biodiversity	Reduce or halt use of agrochemicals and other agricultural practices that harm biodiversity	<i>Capacity building in the field of chemical pesticides circulation with an emphasis on post-registration compliance</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS

## Rest of Non-EU

3f	Biodiversity	Other biodiversity related targets	<i>Adapt to climate change and promote biodiversity as well as agrobiodiversity</i>	Mentioned in most UNFSS pathways for countries of the region (Switzerland, Albania) <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
4	<b>NITROGEN &amp; PHOSPHOROUS</b>				
4a	Fertilizer use	Limit N use	<i>Improving the fertilizer management system</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
4b	Fertilizer use	Limit P use	<i>Improving the fertilizer management system</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
4c	Fertilizer use	Other N and P related targets	<i>The growth of organic production is ensured and supported</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
5	<b>WATER</b>				
5a	Water	Limit water use	<i>Ensuring the closed cycle of water resources use (including reuse of prepared water from domestic treatment plants for irrigation) in all food production chains</i>	Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. <a href="#">National Pathway Transformation of food systems: Ukrainian context</a>	OS
5b	Water	Other water related targets			

## Rest of Non-EU

6 ECONOMY					
6a	Economy	Self-sufficiency			
6b	Economy	Farmers' income	<p><i>Establishment of a national system of advisory services.</i></p> <p><i>Extensive training of small agricultural producers in the latest technologies, especially climate neutral.</i></p>	<p>Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region.</p> <p><a href="#">National Pathway Transformation of food systems: Ukrainian context</a></p>	OS
6c	Economy	Agricultural exports	<p><i>Promotion of Ukrainian agricultural products and food products in foreign markets.</i></p> <p><i>Exports for 2035 onwards are expected to increase by a factor of 1.5 through to 2050.</i></p>	<p>The promotion target is mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region. Thus, we expect a recovery in exports after the war disruption in production. Then we anticipate exports to increase by 2050.</p> <p><a href="#">National Pathway Transformation of food systems: Ukrainian context</a></p>	A
6d	Economy	Timber exports	<p><i>Ensure the sustainable use of water, land, and forest resources.</i></p>	<p>Mentioned in most UNFSS pathways for Albania (the only country mentioning forest resources in the region).</p> <p><a href="#">UNFS Member State Dialogue Convenors and Pathways</a></p>	OS
6e	Economy	Employment in agricultural sector	<p><i>Creation of a nationwide system of support for small food producers.</i></p> <p><i>Establishment of a national system of advisory services.</i></p> <p><i>Encouraging participation of small farmers and self-employed producers of agricultural products in organized product promotion chains.</i></p>	<p>Mentioned in most UNFSS pathways for the major agricultural producer (Ukraine) of the region.</p> <p><a href="#">National Pathway Transformation of food systems: Ukrainian context</a></p>	OS

# Rest of Non-EU

			<i>Improving systems for forecasting the development of the agricultural sector of the economy.</i>
